2017-2018

ESTIMATE TABLES

CORE INDICATORS

| | |
|-------|--|
| 2-3 | NO. 1: Number of additional users of modern methods of contraception |
| 4-5 | NO. 2: Modern contraceptive prevalence rate, MCPR (all women) |
| 6-7 | NO. 3: Percentage of women with an unmet need for modern contraception (married or in-union women) |
| 8-9 | NO. 4: Percentage of women whose demand is satisfied with a modern method of contraception (married or in-union women) |
| 10-11 | NO. 5: Number of unintended pregnancies |
| 12-13 | NO. 6: Number of unintended pregnancies averted due to modern contraceptive use |
| 14-15 | NO. 7: Number of unsafe abortions averted due to modern contraceptive use |
| 16-17 | NO. 8: Number of maternal deaths averted due to modern contraceptive use |
| 18-21 | NO. 9: Percentage of women using each modern method of contraception |
| 22-23 | NO. 10: Percentage of facilities stocked out, by method offered, on the day of assessment |
| 24 | NO. 11: A. Percentage of primary SDPs with at least 3 modern methods of contraception available on day of assessment B. Percentage of secondary/tertiary SDPs with at least 5 modern methods of contraception available on day of assessment |
| 25 | NO. 12: Government expenditure on family planning (USD) |
| 26 | NO. 13: Couple-Years of Protection (CYP) |
| 27-28 | NO. 14: Method Information Index |
| 29 | NO. 15: Percentage of women who were provided with information on family planning during recent contact with a health service provider |
| 30-31 | NO. 16: Percentage of women who decided to use family planning alone or jointly with their husbands/partners |
| 32-33 | NO. 17: Adolescent birth rate (ABR) |
| 34-37 | NO. 18: A. Contraceptive discontinuation rate B. Contraceptive method switching |
| 38-39 | Sources for model-based estimates (Indicators 1-8) |

DISAGGREGATED ESTIMATES

| | |
|-------|--|
| 40-43 | Modern contraceptive prevalence rate, mCPR |
| 44-47 | Percentage of women with an unmet need for any method of contraception |
| 48-51 | Percentage of women whose demand is satisfied with any method of contraception |

INDICATOR NO. 1

Number of additional users of modern methods of contraception

| | |
|-------------------|--|
| DEFINITION | The number of additional women (or their partners) of reproductive age currently using a modern contraceptive method compared to 2012. |
| SCOPE | Reported annually, for all 69 FP2020 focus countries (except Western Sahara). |
| SOURCE | UN Population Division (for number of women of reproductive age); Family Planning Estimation Tool (FPET) for mCPR, using all available household surveys such as DHS, PMA2020, MICS, RHS and comparable national sources, including service statistics where possible. |

All totals exclude South Africa.

Overall and regional totals are rounded based on the sum of unrounded country values.

INDICATOR NO. 2

Modern contraceptive prevalence rate, MCPR (all women)

| | |
|-------------------|--|
| DEFINITION | The percentage of women of reproductive age who are using (or whose partner is using) a modern contraceptive method at a particular point in time. |
| SCOPE | Reported annually, for all 69 FP2020 focus countries (except Western Sahara). |
| SOURCE | Family Planning Estimation Tool (FPET), using all available household surveys such as DHS, PMA2020, MICS, RHS and comparable national sources including service statistics where possible. |

INDICATOR NO. 3

Percentage of women with an unmet need for modern contraception (married or in-union women)

| | |
|-------------------|---|
| DEFINITION | The percentage of fecund women of reproductive age who want no more children or to postpone having the next child, but are not using a contraceptive method, plus women who are currently using a traditional method of family planning. Women using a traditional method are assumed to have an unmet need for modern contraception. |
| SCOPE | Reported annually, for all 69 FP2020 focus countries (except Western Sahara). |
| SOURCE | Family Planning Estimation Tool (FPET), using all available household surveys such as DHS, PMA2020, MICS and RHS. |

INDICATOR NO. 5

Number of unintended pregnancies

| | |
|-------------------|---|
| DEFINITION | The number of pregnancies that occurred at a time when women (and their partners) either did not want additional children or wanted to delay the next birth. Usually measured with regard to last or recent pregnancies, including current pregnancies. |
| SCOPE | Reported annually, for all 69 FP2020 focus countries; 2012 and 2018 figures shown here, figures for intervening years available in online progress report. |
| SOURCE | Core Indicator 1-9 Calculator, using country, regional and global parameters from surveys and other sources. |

INDICATOR NO. 8

Number of maternal deaths averted due to modern contraceptive use

| | |
|-------------------|--|
| DEFINITION | The number of maternal deaths that did not occur during a specified reference period as a result of the protection provided by modern contraceptive use during the reference period. |
| SCOPE | Reported annually, for all 69 FP2020 focus countries (except Western Sahara); 2012 and 2018 figures shown here, figures for intervening years available in online progress report. |
| SOURCE | Core Indicator 1-9 Calculator, using country, regional and global parameters from surveys and other sources. |

| | TOTAL | 105,000 | 137,000 |

All totals exclude South Africa.

Overall and regional totals are rounded based on the sum of unrounded country values.

Estimates of the number of maternal deaths averted differ substantially from the 2016-2017 report because of updates to impact model data inputs. See 'Methodology' section of online report for more information.

INDICATOR NO. 9

Percentage of women using each modern method of contraception

| | |
|-------------------|--|
| DEFINITION | The percentage of total family planning users using each modern method of contraception. |
| SCOPE | Reported annually, for all 69 FP2020 focus countries (except Western Sahara). |
| SOURCE | Most recent survey, which may be: DHS, MICS, PMA2020, other national surveys. |

Facility surveys from PMA2020 are not nationally representative, rather they are a survey of all facilities in selected enumeration areas. For UNFPA surveys, data show the percentage of service delivery points with 'stock out' of a modern contraceptive method offered in line with national protocols, guidelines and/or laws.

INDICATOR NO. 11

A. Percentage of primary SDPs with at least 3 modern methods of contraception available on day of assessment**B. Percentage of secondary/tertiary SDPs with at least 5 modern methods of contraception available on day of assessment**

| | |
|-------------------|---|
| DEFINITION | A. The percentage of service delivery points (SDPs) that have at least 3 modern methods of contraception available on the day of the assessment. B. The percentage of secondary and tertiary service delivery points (SDPs) that have at least 5 modern methods of contraception available on the day of the assessment. |
| SCOPE | 24 countries (those with sufficient data). |
| SOURCE | UNFPA facility surveys; PMA2020 facility surveys. |

| COUNTRY | PERCENTAGE OF PRIMARY SDPs WITH AT LEAST 3 MODERN METHODS OF CONTRACEPTION AVAILABLE ON DAY OF ASSESSMENT | PERCENTAGE OF SECONDARY/TERTIARY SDPs WITH AT LEAST 5 MODERN METHODS OF CONTRACEPTION AVAILABLE ON DAY OF ASSESSMENT | SOURCE |

| Zimbabwe | \$18,100,000 | 2016 UNFPA/NIDI |

WHO/SHA: System of Health Accounts prepared by national consultants in collaboration with the World Health Organization.
 UNFPA/NIDI: United Nations Population Fund and Netherlands Interdisciplinary Demographic Institute Resource Tracking Project on Family Planning Expenditures.
 FPSA: Family Planning Spending Assessments conducted by national consultants in collaboration with Track20.

INDICATOR NO. 13

Couple-Years of Protection (CYP)

| | |
|-------------------|--|
| DEFINITION | The estimated protection provided by family planning services during a one year period, based upon the volume of all contraceptives sold or distributed free of charge to clients during that period. The CYP is calculated by multiplying the quantity of each method distributed to clients by a conversion factor, which yields an estimate of the duration of contraceptive protection provided per unit of that method. |
| SCOPE | 2012-2017, 24 countries with sufficient available data. |
| SOURCE | Calculated from Health Management Information Systems (HMIS), including DHIS2; Logistics Management Information Systems (LMIS); or other service statistics sources. |

| COUNTRY | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | SOURCE | DATA TYPE |

* Data reported from 2016 FP2020 Progress Report.

** Data reported from 2017 Progress Report.

Blank cells indicate no available data.

INDICATOR NO. 14

Method Information Index

| | |
|-------------------|---|
| DEFINITION | An index measuring the extent to which women were given specific information when they received family planning services. The index is composed of three questions: 1) Were you informed about other methods? 2) Were you informed about side effects? 3) Were you told what to do if you experienced side effects? The reported Method Information Index value is the percent of women who responded “yes” to all three questions. |
| SCOPE | 39 countries, reported for the year with the most recent national survey data, from 2012 to present. |
| SOURCE | For each country, the most recent national survey (DHS, PMA2020). Data reflect all women, except for Afghanistan, Egypt, Pakistan, and Yemen, which reflect married or in-union women. |

| COUNTRY | METHOD INFORMATION INDEX | PERMANENT | LONG-ACTING | | SHORT-TERM | |

INDICATOR NO. 15

Percentage of women who were provided with information on family planning during recent contact with a health service provider

| | |
|-------------------|---|
| DEFINITION | The percentage of women who were provided information on family planning within the last 12 months through contact with a health service provider or fieldworker. |
| SCOPE | 36 countries, reported for year with most recent national survey data, from 2012 to present. |
| SOURCE | For each country, the most recent national survey (DHS, PMA2020). Data reflect all women, except for Afghanistan, Pakistan, and Yemen, which reflect married or in-union women. |

| COUNTRY | VALUE | INDICATOR BY WEALTH QUINTILE | | | | | SOURCE |
|-----------------|-------|------------------------------|--------|--------|--------|---------|-----------------|
| | | POOREST | POORER | MIDDLE | RICHER | RICHEST | |
| Afghanistan | 23.0 | 20.6 | 20.6 | 21.3 | 26.4 | 26.4 | 2015 DHS |

INDICATOR NO. 16

Percentage of women who decided to use family planning alone or jointly with their husbands/partners

| | |
|-------------------|--|
| DEFINITION | The percentage of women currently using family planning whose decision to use was made mostly alone or jointly with their husband/partner. |
| SCOPE | 40 countries, reported for year with most recent national survey data, from 2012 to present. |
| SOURCE | For each country, the most recent national survey (DHS, PMA2020). |

| COUNTRY | VALUE | INDICATOR BY WEALTH QUINTILE | | | | | SOURCE |
|-----------------|-------|------------------------------|--------|--------|--------|---------|-----------------|
| | | POOREST | POORER | MIDDLE | RICHER | RICHEST | |
| Afghanistan | 87.5 | 92.1 | 84.2 | 85.6 | 87.3 | 88.2 | 2015 DHS |
| Bangladesh | 91.1 | 89.6 | 91.6 | 91.1 | 92.0 | 90.9 | 2014 DHS |
| Burkina Faso | 90.0 | 89.3 | 96.2 | 89.2 | 91.1 | 84.7 | 2017 PMA2020 R5 |

INDICATOR NO. 18

A. Contraceptive discontinuation rate¹

| | |
|-------------------|---|
| DEFINITION | Among women of reproductive age who began an episode of contraceptive use 3-62 months before being interviewed, the percentage of episodes where the specific method is discontinued within 12 months after beginning its use, reported by whether the woman discontinued while in need of contraception, discontinued because she is not in need of contraception, and the total all-reasons discontinuation rate. |
| SCOPE | 32 countries, reported for year with most recent national survey data, from 2012 to present. |
| SOURCE | For each country, the most recent DHS survey. |

DISCONTINUATION WHILE IN NEED²

| COUNTRY | LONG-ACTING | | SHORT-TERM | | |
|-----------------|-------------|---------|------------|------|----------------|
| | IUD | IMPLANT | INJECTABLE | PILL | CONDOMS (MALE) |
| Afghanistan | 8.8 | | 9.6 | 8.3 | 9.9 |
| Bangladesh | | 3.5 | 17.8 | 17.9 | 22.6 |
| Burundi | *25.4 | 15.9 | 31.4 | 39.0 | 29.9 |
| Cambodia | 8.6 | 6.1 | 23.3 | 17.7 | 21.6 |
| Comoros | | | 15.2 | 8.7 | |
| Egypt | 9.0 | 11.9 | 22.1 | 23.1 | 23.4 |
| Ethiopia | 11.3 | 6.4 | 19.7 | 47.3 | |
| Gambia | | | 17.2 | 22.2 | |
| Ghana | | 6.2 | 20.7 | 19.0 | 11.6 |
| Honduras | 23.3 | | 34.9 | 40.1 | 46.3 |
| India | 16.0 | | *40.2 | 32.0 | 23.3 |
| Indonesia | 4.2 | 6.3 | 16.1 | 27.7 | 21.6 |
| Kenya | 5.2 | 7.2 | 21.0 | 32.7 | 10.2 |
| Kyrgyz Republic | 6.3 | | | 30.3 | 19.5 |
| Lesotho | | | 16.9 | 21.1 | 13.0 |
| Liberia | | 2.7 | 21.0 | 27.7 | |
| Malawi | 7.9 | 5.8 | 26.0 | 44.1 | 35.3 |
| Mali | | 10.9 | 32.0 | 28.1 | |
| Myanmar | 6.1 | | 27.4 | 21.5 | |
| Nepal | 22.3 | 7.0 | 24.4 | 18.0 | 16.3 |
| Niger | | | 24.3 | 15.8 | |
| Nigeria | 3.2 | | 14.6 | 11.2 | 5.6 |
| Pakistan | 22.9 | | 46.9 | 41.3 | 21.7 |
| Rwanda | | 2.4 | 20.0 | 33.0 | 27.5 |
| Senegal | | 4.7 | 29.7 | 22.5 | |
| Sierra Leone | | 7.6 | 18.9 | 20.1 | 22.9 |
| Tajikistan | 5.3 | | 26.6 | 15.9 | 18.6 |
| Tanzania | | 7.3 | 23.2 | 23.8 | 16.2 |
| Uganda | 19.9 | 16.7 | 36.3 | 46.4 | 22.4 |
| Yemen | 14.4 | 23.0 | 35.0 | 28.3 | 34.2 |
| Zambia | 11.1 | 3.5 | 17.4 | 21.1 | 15.4 |
| Zimbabwe | | 5.7 | 23.2 | 13.1 | 19.9 |

¹ The rate is calculated using a multiple decrement life-table approach, which takes into account competing reasons for discontinuation.

² Reasons for discontinuation while a woman is in need: method failure, health concerns or side effects, wanting a more effective method, inconvenience of using a method, lack of access to a method or a method being too far, cost of a method, opposition from a husband, and other context-specific reasons.

* Small sample size.

Blank cells indicate that the sample size is too small for inclusion or that no data are available.

DISCONTINUATION WHILE NOT IN NEED³

| COUNTRY | LONG-ACTING | | SHORT-TERM | | CONDOMS (MALE) |
|-----------------|-------------|---------|------------|------|----------------|
| | IUD | IMPLANT | INJECTABLE | PILL | |
| Afghanistan | 1.6 | | 7.2 | 12.1 | 8.7 |
| Bangladesh | | 2.7 | 6.4 | 14.6 | 16.2 |
| Burundi | *13.8 | 4.8 | 14.5 | 15.6 | 20.7 |
| Cambodia | 0.5 | 1.1 | 9.3 | 8.9 | 16.6 |
| Comoros | | | 8.1 | 4.8 | |
| Egypt | 5.3 | 2.8 | 13.6 | 18.5 | 8.5 |
| Ethiopia | 2.0 | 4.5 | 18.5 | 22.8 | |
| Gambia | | | 8.0 | 10.2 | |
| Ghana | | 0.7 | 8.4 | 10.6 | 23.5 |
| Honduras | 1.9 | | 11.6 | 19.7 | 28.4 |
| India | 3.0 | | *12.0 | 16.0 | 20.1 |
| Indonesia | 1.3 | 1.3 | 7.9 | 11.4 | 8.6 |
| Kenya | 0.6 | 0.5 | 8.2 | 10.2 | 26.7 |
| Kyrgyz Republic | 3.0 | | | 12.4 | 9.3 |
| Lesotho | | | 3.2 | 5.8 | 6.3 |
| Liberia | | 5.8 | 3.3 | 4.4 | |
| Malawi | 5.4 | 1.7 | 13.8 | 16.7 | 24.9 |
| Mali | | 5.9 | 17.7 | 20.0 | |
| Myanmar | 1.0 | | 14.0 | 21.6 | |
| Nepal | 5.9 | 0.6 | 34.0 | 55.8 | 52.5 |
| Niger | | | 28.9 | 26.9 | |
| Nigeria | 5.2 | | 6.7 | 12.5 | 11.3 |
| Pakistan | 2.3 | | 11.3 | 13.9 | 14.6 |
| Rwanda | | 0.6 | 6.9 | 7.2 | 8.7 |
| Senegal | | 2.5 | 12.2 | 23.7 | |
| Sierra Leone | | 1.2 | 5.0 | 5.7 | 12.7 |
| Tajikistan | 3.1 | | 11.3 | 10.6 | 8.8 |
| Tanzania | | 2.3 | 8.8 | 9.9 | 11.6 |
| Uganda | 7.6 | 3.8 | 15.4 | 20.6 | 22.7 |
| Yemen | 3.6 | 3.3 | 10.1 | 17.1 | 11.9 |
| Zambia | 0.0 | 0.4 | 7.4 | 8.8 | 7.4 |
| Zimbabwe | | 0.5 | 6.7 | 7.3 | 18.3 |

³ Reasons for discontinuation because a woman is not in need: wanting to become pregnant, infrequent sex or husband's absence, marital dissolution/separation, difficulty in getting pregnant/menopause.

TOTAL DISCONTINUATION (ALL REASONS)

| COUNTRY | LONG-ACTING | | SHORT-TERM | | |

*Small sample size.

Blank cells indicate that the sample size is too small for inclusion or that no data are available.

INDICATOR NO. 18

B. Contraceptive method switching

| | |
|-------------------|--|
| DEFINITION | Among women of reproductive age who began an episode of contraceptive use 3-62 months before being interviewed, the percentage of episodes where the specific method is discontinued within 12 months after beginning its use, and use of a different method begins after no more than one month of non-contraceptive use. |
| SCOPE | 32 countries, reported for year with most recent national survey data, from 2012 to present. |
| SOURCE | For each country, the most recent DHS survey. |

SWITCHING TO A DIFFERENT METHOD⁴

| COUNTRY | LONG-ACTING | | SHORT-TERM | | | SOURCE |
|-----------------|-------------|---------|------------|------|----------------|-------------|
| | IUD | IMPLANT | INJECTABLE | PILL | CONDOMS (MALE) | |
| Afghanistan | 0.9 | | 1.6 | 2.3 | 2.3 | 2015 DHS |
| Bangladesh | | 2.6 | 12.7 | 10.9 | 18.2 | 2014 DHS |
| Burundi | *3.8 | 3.6 | 4.9 | 10.5 | 5.7 | 2016 DHS |
| Cambodia | 5.9 | 2.7 | 11.8 | 7.9 | 14.1 | 2014 DHS |

| Indonesia | 3.1 | 4.3 | 12.0 | 19.6 | 18.3 | 2012 DHS |
| Kenya | 3.8 | 3.7 | 10.2 | 21.5 | 4.6 | 2014 DHS |
| Kyrgyz Republic | 2.2 | | | 12.5 | 3.2 | 2012 DHS |
| Lesotho | | | 8.6 | 10.1 | 7.4 | 2014 DHS |
| Liberia | | 0.0 | 1.1 | 2.2 | | 2013 DHS |
| Malawi | 1.7 | 1.0 | 3.8 | 13.1 | 14.2 | 2015-16 DHS |
| Mali | | 2.2 | 3.5 | 4.4 | | 2012-13 DHS |
| Myanmar | 4.4 | | 11.6 | 10.4 | | 2015-16 DHS |
| Nepal | 9.8 | 4.3 | 9.6 | 7.5 | 8.9 | 2016 DHS |
| Niger | | | 10.0 | 4.4 | | 2012 DHS |
| Nigeria | 0.5 | | 2.7 | 1.8 | 1.6 | 2013 DHS |
| Pakistan | 8.5 | | 16.5 | 13.8 | 5.7 | 2012-13 DHS |
| Rwanda | | 0.7 | 8.5 | 21.0 | 14.8 | 2014-15 DHS |
| Senegal | | 0.8 | 9.5 | 4.2 | | 2016 DHS |
| Sierra Leone | | 1.5 | 4.1 | 4.8 | 17.6 | 2013 DHS |
| Tajikistan | 1.1 | | 8.7 | 7.2 | 5.3 | 2012 DHS |
| Tanzania | | 1.7 | 5.5 | 7.8 | 11.4 | 2015-16 DHS |
| Uganda | 5.2 | 3.0 | 3.8 | 9.4 | 4.7 | 2016 DHS |
| Yemen | 8.1 | 9.4 | 13.9 | 8.7 | 20.3 | 2013 DHS |
| Zambia | 4.8 | 1.0 | 4.1 | 7.3 | 12.6 | 2013-14 DHS |
| Zimbabwe | | 1.7 | 12.3 | 5.3 | 11.3 | 2015 DHS |

⁴ This indicates either a) an episode of use of one method which is discontinued and immediately followed by an episode of use of another method or b) discontinuation of one method due to "wanting a more effective method," followed by no more than one month of non-contraceptive use before beginning to use a different contraceptive method (regardless of whether it is more or less effective than the original method). Switching is not exclusive of other reasons for discontinuation and is not included in the total discontinuation rate.
